

MDH RADIOLOGY

INTEGRATED BREAST IMAGING SOLUTIONS

Our corporate strategy is to operate with a true baseline of excellence. We strive to combine unparalleled patient experience, cutting-edge technology and premium services linked with the timeless values of the Hippocratic Oath. We are uniquely qualified to assist all providers, nationwide, with giving women what they deserve – early detection and a comprehensive premium service.

Our model appeals to providers of breast care of all levels and sites of service. We ensure the highest quality partnership for the practice, guaranteeing that excellence is delivered on all fronts.

- US-Board Certified Radiologists and expert sub-specialized reading and reporting in accordance with MQSA guidelines and ACR accreditation.
- Strategic alliances with industry-leading breast imaging hardware and software solutions. These are included for the patients at no extra costs.
- Mammopad for improved imaging and patient comfort.
- Volpara for breast density measurements.
- CADstream software for breast MRI reading.
- PENRAD reporting software with Breast Cancer Risk profiles included for every patient.
- Breast Imaging.
- United Medical Systems (UMS) for mobile deployment teams.
- Live video conferencing with our team of experts and sub-specialists is always available for patients, technicians, and all referral doctors or teams 24/7/365.
- Comprehensive MQSA/FDA compliant reports.
- Direct access to the PENRAD digital reports and letters.
- An exclusive "buy-back" program – we will buy your used stereotactic tables so that you can upgrade and optimize your biopsy services through our mobile-deployment team.

MDH RADIOLOGY INTEGRATED BREAST IMAGING SOLUTIONS

- Mammopad included
- PENRAD breast cancer risk assessment included in reports
- Tomosynthesis reading capabilities
- Pre-paid shipping and free returns of historical films

ADVANCED DIAGNOSTIC SOLUTIONS

Top quality sub-specialty real-time remote supervision of diagnostic studies

- Dedicated MRI CAD server for state-of-the-art breast MRI reading and reporting
- Verbal follow-up communication with referral physicians and breast surgeons for all patients with positive results (BI-RADS 4, 5 and 6)

BIOPSY SOLUTIONS

The first radiology service to offer deployment of mobile biopsy equipment on-site, at your facility, with no capital investment or staff requirements.

- Deployment of highly qualified technical and medical staff on-site to perform all procedures
- All biopsy medical supplies included: Titanium clips, vacuum assisted devices and disposable needles for all modalities

THE 10 POINT CONTINUUM OF WOMEN'S BREAST SCREENING, DIAGNOSTIC AND BIOPSY SERVICES.

WHY US

KNOWLEDGE IS POWER. ACCESS IS FREEDOM. CONNECTING THE TWO IS OUR MISSION.

MDH Radiology is the first and only Integrated Breast Imaging Solution in the market to provide the full scope of breast imaging and biopsy services to any health care provider.

Partner with us to optimize and complement your technology, equipment, staff and professional services for an unparalleled patient experience and growth for your practice.

We offer a complete, integrated portfolio of high-level remote and onsite breast imaging services and premium products readily available to complement your current services or expand your practice to include the full continuum of women's breast imaging services.

We come to you – With no capital investment or staff requirements, we are the first company in the US to offer on-site deployment of highly qualified staff, mobile equipment and supplies to perform all modalities of breast biopsy.

Technology-Forward – We use sophisticated, state of the art hardware and software technology, at no additional cost to our clients, including **Merge CADstream** for **MRI**, **PENRAD**, **Breast Imaging** and **Volpara** for breast density assessment. Additionally, each patient receives a complimentary **MammoPad** for a softer mammogram experience.

Patients come first – With 24/7/365 access to our U.S. Board certified dedicated breast radiologists and 24-48 hour turnaround times, we deliver the breast imaging interpretations and unparalleled patient care you need when you need it - no exceptions.

We give back – Founder and CEO Dr. Denisse Hurvitz is an active advocate and educator for women's breast health involved in not-for-profit breast imaging projects around the globe. Her innovative business model aims to bridge the gap in access to critical breast imaging services, offering a premium patient experience and increased value for patients and providers.
